

Passion, Recognition, Challenge and Respect.

Since 1951, the oil and gas industry has turned to Sproule for quality petroleum engineering and geological consulting services. Specializing in evaluations of oil and natural gas reserves we currently have an opening for a Senior Petroleum Engineer.

The Senior Petroleum Engineer will have extensive oil and gas reservoir experience with a working knowledge of production, operations and field development planning as it relates to conventional oil and gas reserves. This position provides the opportunity to work with domestic clients on a wide range of projects, mostly year-end evaluations, and acquisitions and divestitures. Good communication skills and an ability to work independently or on a team are necessities. A background in reservoir evaluation would be an asset.

This is your opportunity to become involved in this very exciting and expanding field. As a Senior Petroleum Engineer, you will have the opportunity to take the knowledge that you have and apply it to a wide variety of projects for a diverse group of clients. You will also have the opportunity to gain knowledge related to emerging technologies, business applications, and economic implications.

You will work side-by-side with other highly skilled professionals to continually build on your own technical and personal skills. This position offers an attractive compensation plan with a salary commensurate with production company standards.

You will also have the potential to become a shareholder of the company and to participate in our stock option plan. If you are interested in a career with a difference, please apply to:
