

## **TONY WONG, P.Geol.**

### *Associate*

Phone: 1-403-294-5579

Fax: 1-403-294-5570

E-Mail: [tony.wong@sproule.com](mailto:tony.wong@sproule.com)

Tony has been a Sproule professional since 2004. He has experience in Argentina, the British North Sea, Canada, China, Egypt, Equatorial Guinea, Iraq, Kazakhstan, Sudan and Syria. Tony is fluent in Mandarin and Cantonese.

### *Diplomas and Degrees*

- ❖ B.Sc., Geology (1978), University of Calgary, Calgary, Alberta, Canada

### *Memberships*

- ❖ Association of Professional Engineers, Geologists and Geophysicists of Alberta (APEGGA)
- ❖ Canadian Society of Petroleum Geologists (CSPG)
- ❖ Canadian Well Logging Society (CWLS)

### *Work Responsibilities*

- ❖ Evaluate geology and petrophysics of oil and gas reservoirs (both sandstone and carbonate), properties and prospects.
- ❖ Analyze oil and gas plays for potential reserve assessments.
- ❖ Map and model oil and gas reservoirs.
- ❖ Conduct regional geological studies.
- ❖ Undertake exploration geology.
- ❖ Generate oil and gas prospects.

### ***Previous Employers***

- ❖ 2002-2004     **Big Sky Exploration**, Calgary, Alberta — *Consulting Geologist*
  - ❖ Generated prospects for exploration and development drilling in Western Canada, as well as Kazakhstan.
  - ❖ Evaluated farmin candidates and other joint venture opportunities in Western Canada, as well as Kazakhstan.
  
- ❖ 1995-2002     **Sunwing Energy**, Calgary, Alberta — *Senior Geologist*
  - ❖ Utilized geological knowledge, interpersonal and communication skills to find, evaluate, and screen petroleum properties as joint venture prospects.
  - ❖ Reviewed reservoirs in major oilfields of China.
  - ❖ Led multi-disciplinary teams to negotiate petroleum development contracts in China.
  - ❖ Participated in IPO process and handled technical presentations in Hong Kong.
  
- ❖ 1994-1995     **Sproule Associates Limited**, Calgary, Alberta — *Senior Geologist*
  - ❖ Conducted log and reservoir evaluations, pool studies, and reserves determinations. Utilized multi-discipline approach to evaluate oil and gas properties, i.e. using logs, drill stem test and AOF test results, seismic data, and production data for assessment.
  - ❖ Used AccuMap system for mapping and evaluations.
  - ❖ Gathered, screened, and evaluated data on oil and gas properties.
  - ❖ Played a key role in negotiations of petroleum development contracts in China.
  
- ❖ 1981-1994     **Alberta Energy and Utilities Board**, Calgary, Alberta — *Senior Geologist*
  - ❖ Analyzed complex applications and submissions and prepared recommendations.
  - ❖ Examined and reviewed geological data submitted by applicants and provided accurate assessments of the applications.
  - ❖ Participated in public hearings and provided geological support in the process.
  - ❖ Conducted detailed pool studies to ensure fairness in the rulings.
  - ❖ Conducted routine well evaluations, log evaluations, geological mapping, pool studies and reserves determinations in northeastern and central Alberta.
  - ❖ Carried out special pool studies and presented results to management.
  - ❖ Conducted heavy oil assessments in Cold Lake area of Alberta.
  
- ❖ 1978-1981     **Harris Oil Consultants**, Calgary, Alberta — *Wellsite Geologist*
  - ❖ Provided technical wellsite supervision and advice to the drilling engineers.
  - ❖ Conducted onsite drill cutting, core examination and logging.
  - ❖ Carried out mud logging and preparation of strip logs.
  - ❖ Conducted onsite log evaluations and assessments of zones of interest.
  - ❖ Picked formation tops, cores and test intervals.

### *Special Expertise*

- ❖ I am knowledgeable about the inner workings of the Chinese oil industry and its unique operations.
- ❖ Over the years, I have gained the trust and support of my counterparts in China to help move projects forward.
- ❖ I am familiar with “Russian style” logs, drilling and testing procedures, production records and reporting procedures and technical jargons.

### *Regional Specialities*

- ❖ I spent many years working in northeastern, northwestern and central Alberta. I also conducted studies in Viking shallow gas in northeastern Alberta, the Grosmont gas trend, Colony Channel reservoirs in central Alberta, heavy oil properties at Esso Cold Lake, and the Gilwood reservoirs in the Peace River Arch region.
- ❖ I’ve worked in many major oilfields in China, such as Daqing, Dagang, Liaohe, Zhongyuan, Sichuan, Tuha, Changqing, Jiangsu and Huabei.
- ❖ I have evaluated many SAGD projects in Alberta.
